Summary

Pre-final year B.Tech Computer Engineering student with strong expertise in Android application development using Kotlin and Jetpack Compose. Experienced in building real-time mobile applications using Firebase Authentication and Realtime Database following MVVM architecture. Solid foundation in Data Structures and Algorithms, clean architecture, and scalable mobile app design. Seeking Android Developer / Software Engineering internship opportunities.

Education

• Pimpri Chinchwad College Of Engineering ,Pune	2023-2027
Computer Engineering(Regional) CGPA 7.42	Present
• Vikas Hindi Vidyalaya , Pandharkawada	2022-2023
MAHARASHTRA BOARD 71.33%	
• Gurukul English Medium School , Pandharkawada	2020-2021
CBSE (Class X) 85.50%	

Technical Skills

- **Programming Languages:** Kotlin, Java, Python, C++, C, SQL
- **Android Development:** Jetpack Compose, XML, Android Studio, MVVM
- **Backend & Cloud:** Firebase Authentication, Firebase Realtime Database, REST APIs
- **Tools & Platforms:** Git, GitHub, Cloudinary, Postman
- **Core CS:** Data Structures and Algorithms, OOPs, DBMS
- **Data Analysis:** Pandas, Matplotlib, Seaborn, Scikit-learn

INTERNSHIP EXPERIENCE

Android Development Intern – SpaceECE, Pune	Aug 2025 – Nov 2025
<ul style="list-style-type: none">Worked on the Android Milestone Tracker project.Developed Android features using Kotlin and Firebase.Collaborated in an agile environment and delivered assigned modules successfully.	
Infosys Springboard Internship 6.0 (B3)	Sep 2025 – Nov 2025
<ul style="list-style-type: none">Developed SmartQuizzer, an adaptive AI-based quiz generator.Applied AI-driven logic to enhance personalized learning experiences.	

Project

- **WhatsApp Clone – Android Application**
 - Tech Stack: Kotlin, Jetpack Compose, Firebase, MVVM, Hilt
 - Built a real-time chat application with OTP-based phone authentication using Firebase Authentication, implemented real-time messaging with Firebase Realtime Database, and designed chat, profile, status, and call user interfaces using Jetpack Compose, following MVVM architecture, Jetpack Navigation Compose, and Hilt for scalable and maintainable development.
- **Agri Mart App – Agricultural Marketplace**
 - Tech Stack: Kotlin, Firebase Realtime Database
 - Developed a real-time agricultural marketplace Android application with secure authentication, multi-image uploads, and dynamic product listings, ensuring live data synchronization and optimized UI performance.
- **Laundry Mart App – Android Application**
 - Tech Stack: Kotlin, XML, Firebase
 - Created a laundry management Android application with login and signup functionality, enhancing user experience through animations and improved UI design.

Certifications

- **Basics of python** - Coding Ninjas
- **Programming in Modern C++** - NPTEL
- **Introduction to SQL** – Simplilearn
- **Introduction to Deep Learning** - Infosys Springboard
